ENERGY SAVING DOOR TINTS

Give your customers a new way to look at refrigeration with SUMMIT's door tints. Available in five colors, these tinted films can be applied to any glass door refrigerator, freezer, or wine cellar, adding a unique look that helps to improve a unit's temperature performance and reduce energy consumption.

MIRROR FINISH

12% Visibility • 85% Solar Energy Rejection
Option T1 (for compact & undercounter sizes)
Near opaque low-E film for maximum energy savings but less product visibility

DARK SMOKE

15% Visibility • 83% Solar Energy Rejection
Option T1S (for compact & undercounter sizes)
Option T1SF (for two-door or full-sized models)
Reflective film in dark neutral tint for high energy savings and reduced product visibility

MIDNIGHT BLUE

28% Visibility • 69% Solar Energy Rejection
Option T2 (for compact & undercounter sizes)
Option T2F (for two-door or full-sized models)
Reflective film in deep blue hue for high energy savings and reduced product visibility

LIGHT BLUE

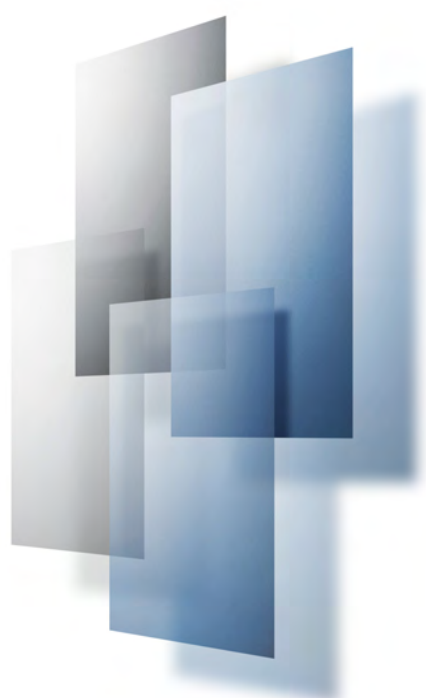

48% Visibility • 54% Solar Energy Rejection
Option T3 (for compact & undercounter sizes)
Option T3F (for two-door or full-sized models)
Reflective film in soft blue finish for moderate energy savings and product visibility

LIGHT SMOKE

67% Visibility • 29% Solar Energy Rejection
Option T4 (for compact & undercounter sizes)
Option T4F (for two-door or full-sized models)
Subtle, nearly transparent tint provides moderate protection and full interior visibility

NOTE: The final look of each tint may vary based on the style and finish of the unit it has been applied to. Actual tint may appear lighter or darker in person. Learn more at summitappliance.com/tint
