

Installation Instructions for CWH1/CWH2 Fastening Plates

These fastening plates can be used to connect the cabinet and hutch into one vertical unit so that the hutch does not tip over when stacked, ensuring stability and security for your new product.

WARNING: It is highly recommended to install these fastening plates to reduce the risk any tipping risk.

REQUIRED TOOLS:

- Power Drill

INCLUDED IN THIS KIT:

- 4 screws
- 2 fastening plates
- 1 instruction manual

1. Identify and gather all parts and pieces.
2. Remove the leveling legs from the hutch.
3. Place the hutch on top of the cabinet.
4. Place the fastening plate 4 inches from the left corner. The bottom of the fastening plate should be aligned with the top of the cabinet, and the top of the fastening plate should be aligned to the bottom of the hutch.
5. Drill the supplied screws into each hole of the fastening plate to connect the cabinet and hutch.
6. Repeat steps 4 and 5 for the right fastening plate and complete the assembly.
