

## Installing Your Slide-Out Storage Drawer

SKUs: TD15SD, TD24, TD24SD

This drawer can be installed on top of your refrigerator to provide extra non-refrigerated storage.

### WARNING:

**DO NOT DRILL INTO YOUR REFRIGERATOR WHEN INSTALLING THIS DRAWER**

Some refrigerators have electrical or refrigerant lines on the top, and you can ruin yours.

### INCLUDED IN THIS KIT

- 1 L-Bracket (with adhesive strips already attached)
- 1 Slide-Out Storage Drawer
- 1 Instruction Manual

## INSTRUCTIONS

1. Gather and identify all parts.
2. Peel off the protective film covering the drawer.
3. Place the drawer on top of your unit. Make sure it perfectly aligns on all sides.
4. Peel the protective layer off the L-bracket's adhesive strips.
5. Align one side of the L-bracket on the rear of the refrigerator and the other over the rear lip of the drawer assembly
6. When aligned completely, peel the tape from the adhesive strip on the rear and top and press into place.

*Align L-bracket over the drawer and flush with the appliance's rear*

## INSTALLING A PANEL ON YOUR DRAWER (OPTIONAL)

This drawer is designed to accept custom overlay panels on its front.

### Panel Dimensions:

Drawer Front: 2" H x 14 1/4" W (TD15 models)

2" H x 23 1/4" W (TD24 models)

Thickness should match your cabinet fronts.

## INSTRUCTIONS

1. Remove the knobs from the drawer by unscrewing the screws behind the drawer's front.
2. Attach your own handle to the panel's face.
3. Place your custom panel over the drawer front and align carefully.
4. Using the screw holes from the removed knobs, attach the panel by holding it in position and inserting two wood screws (not provided) from the rear.
